LINUX Command Line

Become a Linux Expert (Input/Output Redirection, Wildcards, File Security, Processes Managing, Shell Programming Advanced Features, GUI elements, Useful Linux Commands)

This book is all about the advanced features that are associated with Linux. These are the features one needs to know in order to be referred to as a “Linux Expert”, thus, after reading this book you will become one. The book begins by explaining more about Linux and what you have learned in the first part of the book. Various Linux features are discussed in this book.

Input and output redirection in Linux is explained, with the emphasis on the use of the “cat” command. Although you are used to using this command to display the contents of a file, you will get to know how to use it to redirect both input and output in Linux.

Appending new contents to an old file using the same command is also introduced. The two wildcards in Linux, mainly “*” and “?” are approached and talked about in depth.

After reading this book you will understand how to get help with commands when needed.

File security in Linux is presented in a way that makes it easy to understand. You will know how to manage permissions on files, including how to grant and remove permissions for users.

The book will also guide you in how to manage processes in Linux, including how to run processes in the background, foreground and suspending them.

You will also learn how to kill processes.

Shell programming is also explored. Most of its advanced features, including creation dialogs and other GUI elements are covered.

The following topics have been discussed in this book:

- ? Definition
- ? Input/output Redirection
- ? Wildcards in Linux
