Goutam Brahmachari

Handbook of Pharmaceutical Natural Products Goutam Brahmachari

In a classical alphabetical format, this two-volume reference covers more than 1000 painstakingly screened natural product structures. For each compound or compound class, a basic chemical characterization is given, followed by a description of the biological source and a discussion of their pharmaceutical potential as lead molecules for new drugs. The latter takes into account the documented uses of many of these compounds in Asian traditional medicine.

By way of its clearly structured, single-page articles, and with the aid of classification tables in the appendix, this dictionary is easy to use and provides quick and reliable information researchers as well for scholars and students.
