**Homotopical Topology (Graduate Texts in Mathematics)** Anatoly Fomenko, Dmitry Fuchs

This textbook on algebraic topology updates a popular textbook from the golden era of the Moscow school of I. M. Gelfand. The first English translation, done many decades ago, remains very much in demand, although it has been long out-of-print and is difficult to obtain. Therefore, this updated English edition will be much welcomed by the mathematical community. Distinctive features of this book include: a concise but fully rigorous presentation, supplemented by a plethora of illustrations of a high technical and artistic caliber; a huge number of nontrivial examples and computations done in detail; a deeper and broader treatment of topics in comparison to most beginning books on algebraic topology; an extensive, and very concrete, treatment of the machinery of spectral sequences. The second edition contains an entirely new chapter on K-theory and the Riemann-Roch theorem (after Hirzebruch and Grothendieck).

### **From reader reviews:**

#### **Frankie Evans:**

The book Homotopical Topology (Graduate Texts in Mathematics) gives you the sense of being enjoy for your spare time. You should use to make your capable more increase. Book can being your best friend when you getting stress or having big problem using your subject. If you can make looking at a book Homotopical Topology (Graduate Texts in Mathematics) to get your habit, you can get a lot more advantages, like add your own capable, increase your knowledge about some or all subjects. It is possible to know everything if you like open up and read a guide Homotopical Topology (Graduate Texts in Mathematics). Kinds of book are several. It means that, science reserve or encyclopedia or other folks. So , how do you think about this e-book?

#### **Vikki Maynard:**

The book Homotopical Topology (Graduate Texts in Mathematics) can give more knowledge and information about everything you want. So why must we leave the good thing like a book Homotopical Topology (Graduate Texts in Mathematics)? Some of you have a different opinion about reserve. But one aim that book can give many information for us. It is absolutely right. Right now, try to closer along with your book. Knowledge or data that you take for that, you can give for each other; you may share all of these. Book Homotopical Topology (Graduate Texts in Mathematics) has simple shape but the truth is know: it has great and massive function for you. You can appear the enormous world by wide open and read a book. So it is very wonderful.

#### **Joyce Cannon:**

The particular book Homotopical Topology (Graduate Texts in Mathematics) has a lot of knowledge on it. So when you check out this book you can get a lot of profit. The book was authored by the very famous author. The writer makes some research ahead of write this book. This specific book very easy to read you may get the point easily after reading this article book.

#### **Mary Fox:**

The book untitled Homotopical Topology (Graduate Texts in Mathematics) contain a lot of information on it. The writer explains the girl idea with easy technique. The language is very straightforward all the people, so do not worry, you can easy to read that. The book was written by famous author. The author provides you in the new time of literary works. It is easy to read this book because you can please read on your smart phone, or model, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site in addition to order it. Have a nice learn.
