Natural Products: The Secondary Metabolites (Tutorial Chemistry Texts)

James R Hanson

Natural Products: The Secondary Metabolites (Tutorial Chemistry Texts) James R Hanson

Natural products are compounds that are produced by living systems and the secondary metabolites are those which give particular species their characteristic features. These natural products include polyketides, terpenoids, phenylpropanoids, alkaloids and antibiotics. The study of these natural products has played a major part in the development of organic and medicinal chemistry and we are now starting to understand the important ecological role that these compounds have. The aim of this book is to describe the major features of these compounds and the way in which chemical and physical methods have been used to establish their structures and then to show how these structures can be rationalised in biosynthetic terms. The first chapter describes the classes of natural product, their biological activity and isolation. Subsequent chapters attempt to link chemical and spectroscopic strategies in structure elucidation, contrasting the classical chemical strategies that were used in the past with modern spectroscopic methods. The final chapter describes the biosynthesis of natural products. The elucidation of the structures of natural products brings together many elements taught in courses on functional group chemistry, stereochemistry and elementary spectroscopy. This book will therefore be welcomed by lecturers and students of second-year chemistry courses. Ideal for the needs of undergraduate chemistry students, Tutorial Chemistry Texts is a major series consisting of short, single topic or modular texts concentrating on the fundamental areas of chemistry taught in undergraduate science courses. Each book provides a concise account of the basic principles underlying a given subject, embodying an independent-learning philosophy and including worked examples.

From reader reviews:

Karen Keegan:

A lot of people always spent their particular free time to vacation or perhaps go to the outside with them family or their friend. Do you realize? Many a lot of people spent they will free time just watching TV, or maybe playing video games all day long. If you wish to try to find a new activity this is look different you can read some sort of book. It is really fun for you personally. If you enjoy the book that you simply read you can spent the entire day to reading a book. The book Natural Products: The Secondary Metabolites (Tutorial Chemistry Texts) it is rather good to read. There are a lot of those who recommended this book. These people were enjoying reading this book. If you did not have enough space to develop this book you can buy the actual e-book. You can m0ore quickly to read this book from the smart phone. The price is not too expensive but this book possesses high quality.

Margaret Gray:

Your reading 6th sense will not betray you actually, why because this Natural Products: The Secondary Metabolites (Tutorial Chemistry Texts) publication written by well-known writer whose to say well how to make book which might be understand by anyone who read the book. Written throughout good manner for you, dripping every ideas and composing skill only for eliminate your current hunger then you still hesitation Natural Products: The Secondary Metabolites (Tutorial Chemistry Texts) as good book not simply by the cover but also with the content. This is one book that can break don't determine book by its cover, so do you still needing yet another sixth sense to pick this specific!? Oh come on your reading sixth sense already told you so why you have to listening to one more sixth sense.

Elizabeth Fischer:

This Natural Products: The Secondary Metabolites (Tutorial Chemistry Texts) is great book for you because the content which is full of information for you who else always deal with world and also have to make decision every minute. That book reveal it info accurately using great arrange word or we can declare no rambling sentences within it. So if you are read that hurriedly you can have whole facts in it. Doesn't mean it only will give you straight forward sentences but tricky core information with attractive delivering sentences. Having Natural Products: The Secondary Metabolites (Tutorial Chemistry Texts) in your hand like getting the world in your arm, information in it is not ridiculous just one. We can say that no guide that offer you world inside ten or fifteen minute right but this guide already do that. So , this is certainly good reading book. Hello Mr. and Mrs. busy do you still doubt which?

Ester Beckles:

Do you like reading a publication? Confuse to looking for your best book? Or your book seemed to be rare? Why so many problem for the book? But almost any people feel that they enjoy with regard to reading. Some people likes examining, not only science book but also novel and Natural Products: The Secondary

Metabolites (Tutorial Chemistry Texts) or even others sources were given information for you. After you know how the good a book, you feel would like to read more and more. Science publication was created for teacher or students especially. Those publications are helping them to add their knowledge. In different case, beside science guide, any other book likes Natural Products: The Secondary Metabolites (Tutorial Chemistry Texts) to make your spare time far more colorful. Many types of book like here.
