Pain Free Foods: The Method Thousands Have Used to End Diverticulitis: Part I of III (Pain Free Foods Program Book 1) Michael Hohlweg

You have probably been told that you will have your digestive disorder for life and that it will get worse over time. The opinion of author Michael Hohlweg and co-author Rachel Hohlweg is these are not “mystery” disease with unknown causes.

Michael and his daughter Rachel go further than explaining the cause. They have dedicated almost 15 years of research and exacting experimentation to eliminate flare-ups, attacks, infections, over-acidification, diarrhea, constipation and inflammation related to diverticulitis, colitis, and Crohn’s.

Using layperson language and simple dietary techniques they developed called “Catalyst Foods,” the father, daughter team has developed an eating program with which they have walked over 10,000 clients out of the digestive disorder nightmare doctors call “diverticulitis”, “diverticulosis”, “colitis”, and “Crohn’s.”

The authors attacked the stigma of these disorders being “untreatable” with personal experience and a belief that doctors and pharmaceutical companies were focused on antibiotics, antacids (PPI’s), steroids, anti-inflammatories, procedures and surgeries and not on helping people eliminate symptoms.

If you look at the actual symptoms of your digestive disorder, you will come to agree that what gastroenterologists call a disease, is a condition of over-acidification and its related inflammation. Those two symptoms “are” your digestive disorder, no matter how they’ve labeled it. Other symptoms such as bloating, gas, diverticula, heartburn, abdominal cramping, and even infection, are all just sub-symptoms of over-acidification and inflammation.

Once you understand this simple truth about digestive disorders, it is easier to understand that eliminating two symptoms can actually eliminate all symptoms. Over-acidification and inflammation are not diseases, they are conditions and they only persist when the few eating habits that create them continue. Pain Free Foods shows you how to break the few eating habits unique to Western cultures where these diseases flourish.

Those who say digestive disorders are not diet related are ignoring facts. Two of the most populous regions on earth have almost no incidence of diverticulitis. We are talking about Asia and the African continent. The difference is eating style. For those of you who are trying to think ahead; digestive disorders are not caused by fast food or general poor nutrition or processed foods.

Your digestive disorder is a product of eating style called “catalyst foods.” Catalyst foods is a term that refers to what Mike and Rachel invented which is a food ratio chart called “The Magic Ratio.” This magic ratio allows those who know the program to eat almost any food as long as they combine them according to a certain rule.

If the program is sounding complicated, it’s not. The main regulation of the entire program is given to you in a color chart on one page of the book and a copy can be carried in your pocket or purse. The chart called “the eat out guide” lets you eat at restaurants, friends homes or anywhere you choose although you will often

have to make a minor adjustment to your meal as shown on the chart.

Pain Free Foods is easy to read, understand and follow. Over 4000 of Mike and Rachel's clients are over the age of 65 and many over the age of 80. The book is presented at a high school level and designed to help you succeed. The books are laid out with clear, well-defined indexes so you can find the answer to periodic questions easily without searching or re-reading.

We know you have read and tried things before and you are tired of being disappointed. We know that doctors don't cure digestive disorders and you are looking for a simple, natural way to succeed. If you are tired of being sick and suffering, If you are willing to make some simple dietary changes and kick your digestive disorder out of your life in the process, please consider: Pain Free Foods by Michael and Rachel Hohlweg.

The Pain Free Foods: The Method Thousands Have Used to End Diverticulitis: Part I of III (Pain Free Foods Program Book 1) provide you with a new experience in looking at a book.

Kirk Mathews:

As a college student exactly feel bored in order to reading. If their teacher expected them to go to the library or to make summary for some guide, they are complained. Just tiny students that has reading's heart and soul or real their pastime. They just do what the trainer want, like asked to go to the library. They go to right now there but nothing reading critically. Any students feel that examining is not important, boring along with can't see colorful pics on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Pain Free Foods: The Method Thousands Have Used to End Diverticulitis: Part I of III (Pain Free Foods Program Book 1) can make you feel more interested to read.
