Patterns of Light (Graduate Texts in Mathematics)

Jean-Pierre Aubin, Steven Beeson, James W. Mayer

Patterns of Light (Graduate Texts in Mathematics) Jean-Pierre Aubin, Steven Beeson, James W. Mayer
Progress in the theory of economic equilibria and in game theory has proceeded hand in hand with that of the mathematical tools used in the field, namely nonlinear analysis and, in particular, convex analysis. Jean-Pierre Aubin, one of the leading specialists in nonlinear analysis and its application to economics, has written a rigorous and concise - yet still elementary and self-contained - textbook providing the mathematical tools needed to study optima and equilibria, as solutions to problems, arising in economics, management sciences, operations research, cooperative and non-cooperative games, fuzzy games etc. It begins with the foundations of optimization theory, and mathematical programming, and in particular convex and nonsmooth analysis. Nonlinear analysis is then presented, first game-theoretically, then in the framework of set valued analysis. These results are then applied to the main classes of economic equilibria. The text continues with game theory, non-cooperative (Nash) equilibria, Pareto optima, core and finally some fuzzy game theory. The book closes with numerous exercises and problems: the latter allow the reader to venture into areas of nonlinear analysis that lie beyond the scope of the book and of most courses.

From reader reviews:

Stuart Ross:

Within other case, little individuals like to read book Patterns of Light (Graduate Texts in Mathematics). You can choose the best book if you love reading a book. Given that we know about how is important some sort of book Patterns of Light (Graduate Texts in Mathematics). You can add understanding and of course you can around the world by a book. Absolutely right, due to the fact from book you can realize everything! From your country until eventually foreign or abroad you can be known. About simple matter until wonderful thing you are able to know that. In this era, we can easily open a book or searching by internet gadget. It is called e-book. You can utilize it when you feel weary to go to the library. Let's examine.

Brent Jones:

The ability that you get from Patterns of Light (Graduate Texts in Mathematics) is the more deep you excavating the information that hide in the words the more you get interested in reading it. It doesn't mean that this book is hard to understand but Patterns of Light (Graduate Texts in Mathematics) giving you joy feeling of reading. The author conveys their point in particular way that can be understood through anyone who read this because the author of this guide is well-known enough. This book also makes your vocabulary increase well. It is therefore easy to understand then can go along, both in printed or e-book style are available. We recommend you for having this specific Patterns of Light (Graduate Texts in Mathematics) instantly.

Charles Siegrist:

This book untitled Patterns of Light (Graduate Texts in Mathematics) to be one of several books this best seller in this year, that is because when you read this book you can get a lot of benefit in it. You will easily to buy this book in the book retailer or you can order it via online. The publisher of the book sells the e-book too. It makes you easier to read this book, since you can read this book in your Smart phone. So there is no reason for your requirements to past this reserve from your list.

Anne Shivers:

People live in this new day of lifestyle always try and and must have the extra time or they will get wide range of stress from both daily life and work. So , once we ask do people have free time, we will say absolutely of course. People is human not just a robot. Then we ask again, what kind of activity are there when the spare time coming to an individual of course your answer will unlimited right. Then ever try this one, reading textbooks. It can be your alternative with spending your spare time, the particular book you have read is Patterns of Light (Graduate Texts in Mathematics).
