## Green Techniques for Organic Synthesis and Medicinal Chemistry

Green chemistry is a new way of looking at organic synthesis and the design of drug molecules, offering important environmental and economic advantages over traditional synthetic processes. Pharmaceutical companies are increasingly turning to the principles of green chemistry in an effort to reduce waste, reduce costs and develop environmentally benign processes.

*Green Techniques for Organic Synthesis and Medicinal Chemistry* presents an overview of the established and emerging techniques in green organic chemistry, highlighting their applications in medicinal chemistry. The book is divided into four parts:

**Introduction:** Introduces the reader to the toxicology of organic chemicals, their environmental impact, and the concept of green chemistry.

**Green Catalysis:** Covers a variety of green catalytic techniques including organocatalysis, supported catalysis, biocatalysis, fluorous catalysis, and catalytic direct C-H bond activation reactions.

**Green Synthetic Techniques:** Presents a series of new techniques, assessing the green chemistry aspects and limitations (i.e. cost, equipment, expertise). Techniques include reactions in alternative solvents, atom economic multicomponent reactions, microwave and ultrasonic reactions, solid-supported synthesis, fluorous and ionic liquid-based recycling techniques, and flow reactors.

**Green Techniques in Pharmaceutical Industry:** Covers applications of green chemistry concepts and special techniques for medicinal chemistry, including synthesis, analysis, separation, formulation, and drug delivery. Process and business case studies are included to illustrate the applications in the pharmaceutical industry.

*Green Techniques for Organic Synthesis and Medicinal Chemistry* is an essential resource on green chemistry technologies for academic researchers, R&D professionals and students working in organic chemistry and medicinal chemistry.

### **From reader reviews:**

#### **Albert Aucoin:**

This book untitled Green Techniques for Organic Synthesis and Medicinal Chemistry to be one of several books that best seller in this year, this is because when you read this guide you can get a lot of benefit onto it. You will easily to buy this book in the book retail store or you can order it through online. The publisher in this book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Mobile phone. So there is no reason to you personally to past this reserve from your list.

#### **Kathryn Bowen:**

Reading can called mind hangout, why? Because when you find yourself reading a book specifically book entitled Green Techniques for Organic Synthesis and Medicinal Chemistry your head will drift away trough every dimension, wandering in every aspect that maybe not known for but surely can become your mind friends. Imaging just about every word written in a book then become one application form conclusion and explanation in which maybe you never get prior to. The Green Techniques for Organic Synthesis and Medicinal Chemistry giving you another experience more than blown away the mind but also giving you useful info for your better life within this era. So now let us present to you the relaxing pattern here is your body and mind are going to be pleased when you are finished looking at it, like winning a casino game. Do you want to try this extraordinary shelling out spare time activity?

#### **Herbert Willams:**

It is possible to spend your free time to read this book this guide. This Green Techniques for Organic Synthesis and Medicinal Chemistry is simple to deliver you can read it in the playground, in the beach, train as well as soon. If you did not have got much space to bring the printed book, you can buy the actual e-book. It is make you much easier to read it. You can save the actual book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

#### **Jose Coleman:**

That e-book can make you to feel relax. This book Green Techniques for Organic Synthesis and Medicinal Chemistry was bright colored and of course has pictures around. As we know that book Green Techniques for Organic Synthesis and Medicinal Chemistry has many kinds or genre. Start from kids until teenagers. For example Naruto or Investigator Conan you can read and believe you are the character on there. Therefore not at all of book tend to be make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading in which.
