Mathematical Amazements and Surprises: Fascinating Figures and Noteworthy Numbers Alfred S. Posamentier, Ingmar Lehmann
If you've been waiting for a book that will evoke the delight and intrigue that mathematics has to offer, this is the book for you.

What are the odds of finding two people who share the same birth date in a room of thirty-five? Most people would guess they're pretty low. In actuality, the probability is better than 80 percent. This is just one of many entertaining examples of mathematical curiosities presented. Two veteran math educators have created the perfect introduction to the wonders of mathematics for the general reader, requiring only a high school background in the subject.

Among the entertaining and useful tricks they teach are shortcuts in arithmetic, such as ways to determine at a glance the exact divisors of any given number. They also demonstrate how the properties of certain numbers can lead to infinite loops. What is particularly exciting is how many correct answers turn out to be counterintuitive. Exploring all these features will instill insights into the nature of numbers, improve your ability to manipulate them, and give you an appreciation for the inherent elegance of mathematics.

As you marvel at the many unusual relationships and novelties revealed in this ingenious and delightful presentation, you'll be learning more math than you ever thought possible - and will be relishing every moment of it!

From reader reviews:

Corine Ramirez:

Within other case, little folks like to read book Mathematical Amazements and Surprises: Fascinating Figures and Noteworthy Numbers. You can choose the best book if you appreciate reading a book. Provided that we know about how is important a book Mathematical Amazements and Surprises: Fascinating Figures and Noteworthy Numbers. You can add knowledge and of course you can around the world by way of a book. Absolutely right, because from book you can know everything! From your country until finally foreign or abroad you will find yourself known. About simple thing until wonderful thing it is possible to know that. In this era, we are able to open a book as well as searching by internet gadget. It is called e-book. You may use it when you feel weary to go to the library. Let's read.

Erin Weiss:

Now a day people who Living in the era everywhere everything reachable by match the internet and the resources within it can be true or not demand people to be aware of each information they get. How individuals to be smart in obtaining any information nowadays? Of course the correct answer is reading a book. Reading through a book can help people out of this uncertainty Information especially this Mathematical Amazements and Surprises: Fascinating Figures and Noteworthy Numbers book because this book offers you rich info and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it you probably know this.

Kelli Valverde:

Information is provisions for anyone to get better life, information these days can get by anyone on everywhere. The information can be a knowledge or any news even a concern. What people must be consider any time those information which is inside former life are difficult to be find than now could be taking seriously which one is acceptable to believe or which one the resource are convinced. If you have the unstable resource then you get it as your main information it will have huge disadvantage for you. All those possibilities will not happen inside you if you take Mathematical Amazements and Surprises: Fascinating Figures and Noteworthy Numbers as the daily resource information.

Mary May:

Reading can called thoughts hangout, why? Because when you are reading a book especially book entitled Mathematical Amazements and Surprises: Fascinating Figures and Noteworthy Numbers your mind will drift away trough every dimension, wandering in each aspect that maybe not known for but surely might be your mind friends. Imaging each and every word written in a book then become one form conclusion and explanation which maybe you never get ahead of. The Mathematical Amazements and Surprises: Fascinating Figures and Noteworthy Numbers giving you one more experience more than blown away your mind but also giving you useful info for your better life in this era. So now let us demonstrate the relaxing pattern this

is your body and mind is going to be pleased when you are finished examining it, like winning a game. Do you want to try this extraordinary wasting spare time activity?
