Noise Reduction in Speech Processing (Springer Topics in Signal Processing) Jacob Benesty, Jingdong Chen, Yiteng Huang, Israel Cohen

Noise is everywhere and in most applications that are related to audio and speech, such as human-machine interfaces, hands-free communications, voice over IP (VoIP), hearing aids, teleconferencing/telepresence/telecollaboration systems, and so many others, the signal of interest (usually speech) that is picked up by a microphone is generally contaminated by noise. As a result, the microphone signal has to be cleaned up with digital signal processing tools before it is stored, analyzed, transmitted, or played out. This cleaning process is often called noise reduction and this topic has attracted a considerable amount of research and engineering attention for several decades. One of the objectives of this book is to present in a common framework an overview of the state of the art of noise reduction algorithms in the single-channel (one microphone) case. The focus is on the most useful approaches, i.e., filtering techniques (in different domains) and spectral enhancement methods. The other objective of Noise Reduction in Speech Processing is to derive all these well-known techniques in a rigorous way and prove many fundamental and intuitive results often taken for granted. This book is especially written for graduate students and research engineers who work on noise reduction for speech and audio applications and want to understand the subtle mechanisms behind each approach. Many new and interesting concepts are presented in this text that we hope the readers will find useful and inspiring.

From reader reviews:

Dawn Spigner:

Book is to be different for each grade. Book for children right up until adult are different content. To be sure that book is very important for people. The book Noise Reduction in Speech Processing (Springer Topics in Signal Processing) has been making you to know about other know-how and of course you can take more information. It is rather advantages for you. The publication Noise Reduction in Speech Processing (Springer Topics in Signal Processing) is not only giving you much more new information but also to be your friend when you really feel bored. You can spend your current spend time to read your book. Try to make relationship together with the book Noise Reduction in Speech Processing (Springer Topics in Signal Processing). You never really feel lose out for everything if you read some books.

Shirley Demers:

Spent a free a chance to be fun activity to try and do! A lot of people spent their spare time with their family, or their particular friends. Usually they performing activity like watching television, likely to beach, or picnic inside park. They actually doing same every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Might be reading a book can be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to attempt look for book, may be the guide untitled Noise Reduction in Speech Processing (Springer Topics in Signal Processing) can be great book to read. May be it can be best activity to you.

Teresa Riggs:

Many people spending their time frame by playing outside having friends, fun activity with family or just watching TV the whole day. You can have new activity to spend your whole day by examining a book. Ugh, do you consider reading a book can definitely hard because you have to use the book everywhere? It alright you can have the e-book, delivering everywhere you want in your Touch screen phone. Like Noise Reduction in Speech Processing (Springer Topics in Signal Processing) which is finding the e-book version. So , try out this book? Let's observe.

Zandra Woods:

This Noise Reduction in Speech Processing (Springer Topics in Signal Processing) is completely new way for you who has curiosity to look for some information given it relief your hunger details. Getting deeper you upon it getting knowledge more you know or else you who still having little digest in reading this Noise Reduction in Speech Processing (Springer Topics in Signal Processing) can be the light food for you because the information inside this specific book is easy to get simply by anyone. These books acquire itself in the form and that is reachable by anyone, yeah I mean in the e-book form. People who think that in publication form make them feel tired even dizzy this book is the answer. So there isn't any in reading a publication especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss the

idea! Just read this e-book sort for your better life as well as knowledge.
